Dear Colleagues! We invite you to participate in the Eurasian Orthopedic Forum, which will be held on June 28-29, 2019 in Moscow.

The Eurasian Orthopedic Forum (EOF) 2017 received industry-specific recognition – it has laid the groundwork for cooperation of traumatologists, orthopedists, representatives of related specialties and industrial partners from around the world in the presence of constructive dialogue and sharing experience. We are glad that Russia became particularly such a space and we are really grateful to everyone who took an active part in the preparation of the Forum.

At that time, 3,750 people took part in the EOF: specifically, they were medical specialists, government officials, industrial and industry partners from 70 countries around the world.

And now we are taking initiative in promoting the EOF as a comfortable and effective forum for international cooperation in the field of the high-technology medical care delivery and, more broadly, for cooperation on the issues of public health.

In 2019, more than 5,000 delegates will become the participants of the Forum; the agenda of the Forum covers 20 areas of the scientific programme and as many significant issues devoted to the development of the public health, the health industry and manufacturing of medical products, as well as to promoting innovations.

We invite you for cooperation and we hope that the Eurasian Orthopedic Forum will give us the opportunity to unite our knowledge and expand the interaction of multidisciplinary specialists in the Eurasian space.
